Installing Quickstart package is quite easy as you install normal Joomla!. Please follow these steps:

1. You will have 2 options:
 - Upload the **scorpii_quickstart.zip** file to your host and extract it using cPanel or other File Manger Tools if possible.
 - If option above not available, you can extract the **scorpii_quickstart.zip** file in your computer , and upload all file to your host using FTP client program.
- Start installation by typing your URL to the directory you have placed quickstart files. The installation page should be appeared as normal Joomla! installation.
- Login into your administrator panel using "**admin**" as username and "**demo**" as password.
